Significant Humanitarian Facts

Gaza currently holds the highest rate of child amputees per capita globally. (3)

Since the beginning of the Israeli ground invasion in the northern Gaza Strip on October 5, over 4,000 individuals have been reported as martyrs or missing, with an additional 12,000 sustaining injuries. During this period, Israeli occupation forces have rendered 40 out of 72 fire, rescue, and ambulance vehicles inoperable, leaving the remaining vehicles in a state of disrepair. (4)

A recent investigation by the Community Training Center for Crisis Management (CTCM) has indicated that over a year of relentless displacement and bombardment has resulted in severe psychological distress among Gaza's most vulnerable children, pushing their families to the edge of collapse. The findings reveal that %96 of children perceive death as imminent, %92 struggle to accept their reality, %87 experience intense fear, %79 suffer from nightmares, %77 refrain from discussing traumatic experiences, %73 exhibit aggressive behavior, and %49 express a desire to die due to the ongoing conflict.

Risks threatening Gaza Strip

%88 .1 of families have experienced multiple displacements, with %21 having relocated six times or more. The majority of households subsist on a daily income of 4.19$, and %80 of the primary earners are unemployed. Furthermore, approximately %24 of households are led by children as young as 16 years old. (5)

This winter, nearly one million displaced Palestinians in the Gaza Strip are at risk of exposure to cold and rain. While there is an urgent need for protection from these elements, only %23 of the necessary assistance has been provided to the displaced population in Gaza. (3)

Karl Skau, the Deputy Executive Director of WFP, has issued a warning regarding an impending famine in the northern Gaza Strip. He highlighted the program's inability to reach those affected in this region, emphasizing that children are succumbing to starvation due to a severe lack of food.
